Helping You Go Green!

We want to help you more easily source products to meet your sustainability needs. So, we've created a 3-factor method for validating the products in our assortment with accurate & verifiable global sustainable components, sustainable manufacturing practices and a responsible mindset.

- Styles with Sustainable Materials contain all or a portion of verified sustainable fibers or materials.
- Styles with Sustainable Manufacturing
 have been validated across a wide range
 of fabric and product manufacturing
 practices validated by globally
 recognized organization.
- Styles with **Responsible Mindset** are from brands with social and sustainable 'give-back' policies directly linked to the products sold in our industry.
- We also recognize products designed specifically to reduce use of disposable products, products designed to be easily recycled and products designed to reduce packaging waste.

The Next Generation of Performance

What's So Special About CrownLux Performance™ Polos?

You'll love our innovation in performance fabric technology. Devon & Jones® CrownLux Performance™ fabrics offer superior moisture-management, UV protection and travel-ready ease with an impressive professional look and feel.

How Did We Do It?

By using superior fabrics showcasing key trends such as soft mélanges, cotton hand-feels and performance aspects, our quality and innovation are second to none. And it's in our signature corporate styles like the CrownLux Performance™ Plaited Polo family on pages 40-43, where we flipped the script on fabric engineering by knitting strong, smooth wicking polyester on the outside and plaiting it to soft-as-cotton wicking blend on the inside. The result? An incredibly luxurious fabric with the performance features you demand and softness you want next to your skin.

Luxury, Comfort & Performance in One

Complete your look with our CrownLux Performance™ dress shirts on pages 126, 127 plus knits and layering pieces on page 102. They are the right balance of comfort and performance.

sub**D⊛wn**™

UTK SubDown™ is a revolutionary insulation technique that mimics the thermal qualities of down, using an easy-care material that is more hypo-allergenic.

Traditional polyfill batting requires thick, uncomfortable layers to achieve maximum thermal protection from the cold.

UTK SubDown™ fibers mimic the physical dimensions of down and are blown into the garment channels just like down. The result is a lightweight lofty fill with more air pockets and the thermal retention of 600 fill down. UTK SubDown™ is the ideal in "warmth without weight" insulated garments.

^{v⊪} Hydr•pel™

UTK Hydropel™ technology adds superior water-repellent functionality to fabrics.

North End® utilizes UTK Hydropel™ technology in many ways, including seam-sealed waterproof garments for severe wet weather conditions, water-resistant fabrications with a built-in membrane for enhanced wind protection, or a simple DWR (durable water repellent) finish on a lightweight shell. Whatever the level of weather protection needed. North End® has a solution.

Äydrøpel™

UTK Hydropel™ technology adds superior water-repellent functionality to fabrics.

North End® utilizes UTK Hydropel™ technology in many ways, including seam-sealed waterproof garments for severe wet weather conditions, water-resistant fabrications with a built-in membrane for enhanced wind protection, or a simple DWR (durable water repellent) finish on a lightweight shell. Whatever the level of weather protection needed, North End® has a solution

Cerami **Tech**™

UTK CeramiTech™ is a state-of-the art technique that creates the ultimate in lightweight thermal protection. The unique technology encapsulates ceramic powder in an emulsion that is then 'printed' on the underside of the fabric

The UTK CeramiTech™ surface reacts with the body by absorbing and retaining body heat to keep the wearer warm. UTK CeramiTech™ styles are great on their own or as a layering piece under a shell or puffer.
