

DEDICATED TO INNOVATION **2022**
SELECT SPORT AMERICA

WELCOME TO 2022

2022 is a year of celebration for SELECT. 75 years of innovation based on our founder Eigil Nielsen's dedication to creating the perfect ball. It all started in 1947 when Eigil created his first soccer ball that laid the path for him to invent the modern soccer ball as we know it today. His innovative ways have helped SELECT grow through the years and cemented our status as both Player's Choice and League's Choice.

We are dedicated to creating innovative products that meet the highest quality standards. As one of the world's leading manufacturers of hand-sewn, dual-bonded, and thermal bonded balls, we have continued to innovate and expand our line of products since our founding father, Eigil Nielsen, created the first SELECT ball in 1947.

We are the official match ball supplier in many of Europe's top soccer leagues, including several leagues in the United States, stating our position as the number one league partner.

Internationally notable league partnerships include the German Bundesliga and Portuguese Liga Portugal. 2022 will be our fifth year for our German subsidiary DERBYSTAR as official match ball in the Bundesliga and 2nd Bundesliga – ranked as one of the best soccer leagues in the world by FIFA. 2022 will be SELECT's third year as the Liga Portugal official match ball where some of the world's most respected clubs and players take the field.

We know that our actions matter. We are continuously taking sustainable steps in our production, packaging, and business partner efforts. The Planet Eco match ball launched in 2021 with great success as players and fans alike appreciate the innovative approach to utilizing 11 PET plastic bottles to produce the outer cover and backing layers of the new ball.

Like other companies, SELECT pays the market price for the stitching of our balls in Pakistan. But it is our conviction that our responsibility goes further than this. For those people who stitch SELECT balls at our production facility in the Sialkot area, it is our aim to also provide medical and educational assistance for the worker and their whole family. All children must be given the opportunity to have an education as it is key to improving living standards for future generations.

We have now expanded our equipment range substantially to provide the training tools needed for players and leagues at all levels. SELECT's training equipment range has been thoughtfully developed with input from professional players, coaches and youth players alike. The same commitment to the highest quality standards for soccer balls is applied to the 2022 equipment range.

We are the player's choice, the league's choice, and our ongoing mission is to develop high quality products for all players.

Welcome to our catalog for 2022.

THE ORIGINAL 32 PANEL BALL CONSTRUCTION

Every single soccer, handball and futsal ball from SELECT is based on the revolution from 1962, where our founder, Eigil Nielsen, invented a ball made of 32 panels. The overriding desire was to create the most reliable ball with the most predictable, straight flight and a bounce neither too high nor too low.

It was impossible to make a perfectly round ball with just 18 panels, which was the standard construction of a ball in the past. With the 32 panels - 20 hexagons and 12 pentagons - SELECT succeeded in creating the roundest ball ever seen. Later, a group of American scientists won the Nobel Prize for discovering that the molecules of carbon with a special irradiation organize themselves as a complete round ball - something Eigil Nielsen had already discovered and realized in his soccer ball with 32 panels, why the reinvention was named "the soccer ball molecule".

A ball with optimum roundness is essential to obtain reliable aerodynamic - a straight flight and a controlled bounce. Our finest soccer ball, BRILLANT SUPER, has just been thoroughly tested in a wind tunnel at the Institute of Health & Sports Science at the University in Tsukuba, Japan. The results show that BRILLANT SUPER has a better aerodynamic than other top balls in the market. The ball's classic construction with 32 panels means that the ball meets resistance at a later point in its trajectory through the air, thus retaining a steady, high speed over a longer period of time. This provides a stable and more predictable flight - highly valued by all soccer players.

All of our balls today are still based on Eigil Nielsen's original invention of the 32 panel ball construction, as we never compromise on quality, playability or durability.

SOCCER BALLS

OFFICIAL LEAGUE MATCH BALLS

SELECT is the official match ball supplier for the Danish national team, the Portuguese league, the Bosnian and Herzegovinian league, the Romanian league, the Danish men's and women's league and first division, the Norwegian men's and women's league, the Finnish league, the Swedish league and first division. In USA, SELECT is the official match ball of the USL and NJCAA as well as several High School State Conferences nationwide.

Our BRILLANT SUPER ball is also supplied to a vast number of teams and federations around the world.

Furthermore, our German subsidiary DERBYSTAR is the official match ball supplier for the Dutch league and the German Bundesliga. The Bundesliga is ranked as one of the world's best soccer leagues by FIFA.

LIGA NOS PORTUGAL

BRILLANT SUPER is the official match ball in the best league in Portugal – Liga Portugal.

Season 2019-2023 will feature SELECT as the official match ball supplier in all three competitions of the league: 1st league Liga NOS, 2nd league LigaPro and the Portuguese League Cup, Allianz Cup, with a total of 32 teams participating in the competitions.

Liga Portugal is one of the most competitive professional championships in Europe, ranked 6th place by UEFA.

THERMO BONDED – QUALITY INSIDE AND OUT

THERMO BONDED

- QUALITY INSIDE AND OUT

BRILLANT SUPER TB has the characteristics that distinguish a classic SELECT ball and is suitable for matches at the absolute highest level. The materials are carefully selected and have exactly the qualities that give the best playability and durability.

The optimum roundness is ensured with the well known 32 panels spread over 12 pentagons and 20 hexagons. The outer material of the ball consists of synthetic leather with a light surface structure that minimizes air resistance.

Under the synthetic leather hides the SELECT natural latex Zero-Wing bladder with built-in balance point in the opposite end of the valve hole. On the outside of the bladder is a lining made of a 4 mm. thick and exclusive foam material. The outer material and the underlying foam give the ball a softer, lighter and a more comfortable touch. Despite the fact that the ball feels lighter, the weight is the same as a traditional football.

Ball size	Circumference	Normal weight	Light weight
3	60-62 cm.	320-340 g	280-310 g
4	63,5-66 cm.	350-390 g	290-320 g
5	68-70 cm.	410-450 g	350-380 g

TB stands for Thermo Bonding, a method that activates the glue with heat and pressure to bond the 32 panels. There are no stitches, and the TB ball takes up less water keeping the original weight better when playing on a wet surface.

The ball has, among other places, been tested at the Institute for Health & Sports Science at Tsukuba University in Japan. The test results showed that the ball – just like other balls from SELECT – faces less wind resistance in the first part of the flight, moves easier through the air and meets wind resistance later than other balls on the market.

HAND STITCHED – LONG LASTING EXCELLENCE

A SELECT Hand-Stitched soccer consists of five crucial elements:

1

PU
SURFACE

4

ZERO-WING
BLADDER

2

HAND-
STITCHED

5

DOUBLE LOCK
VALVE

3

LINING

2

5

HIDDEN BEHIND THE ELEGANT EXTERIOR

Common to all our balls is that the quality is high and the durability long. An optimally round soccer consists of 32 panels made up of 12 pentagons and 20 hexagons. The 32 panels are sewn together using 630 double stitches and 60 corner stitches and are closed off – especially for SELECT – with a double knot. The ball lasts longer this way.

Hidden behind the elegant exterior of the balls in our Pro and Club Series is a Zero-Wing bladder made of high-performance natural latex. The concept has been developed to ensure that not only the ball but also the bladder is as round as possible. We solely use latex bladders in our soccers with build-in balance point at the opposite side of the valve hole. This, together with the Zero-Wing concept, ensures a perfectly balanced ball with a very lively bounce.

To stabilise the ball and ensure that it remains round, the 32 panels are lined with several layers of textile material. The lining helps to adjust the softness and improves the contact between the ball and the foot.

The outer layer of the ball is made of synthetic leather in polyurethane (PU). The surface of this material can be either "shiny", "grain" or "pattern" and consists of lots of PU fibres. Combined, this gives a strong surface with consistent softness.

High quality is essential for SELECT. For this reason, each ball undergoes a stringent test at our production facilities in Pakistan. Here, they are tested for stitching, surface, roundness, circumference, weight, air retention and colour printing. Even the bladders are inflated to ensure perfect balance. Our standards for quality are the highest in the industry and the balls are of course tested and approved according to FIFA standards.

Ball size	Circumference	Normal weight	Light weight
3	60-62 cm.	320-340 g	280-310 g
4	63,5-66 cm.	350-390 g	290-320 g
5	68-70 cm.	410-450 g	350-380 g

A SELECT ball will last for a very long time if these instructions are followed:
1. Straighten the ball out as best as possible.

2. Shake the ball so that the bladder is hanging loosely and vertically beneath the valve hole.

3. Allow 1 - 2 drops of SELECT valve oil to drip into the valve hole. Remember to oil the ball regularly so that the valve doesn't dry out.

4. Inflate the ball with a SELECT pump. It is important that the bladder is in the vertical position as shown here. Always remember to use the nipple.

5. Use a SELECT pressure gauge to check if the ball has the recommended pressure (see recommendation on the ball).

6. Clean the ball with a brush and tepid water. Dry the ball with a cloth. Place the ball in a ventilated room with a temperature of 59 - 68 degrees.

THE HISTORY BEHIND THE SELECT BRILLANT SUPER THE WORLD'S FINEST SOCCER BALL

Hiding behind the exclusive exterior of the BRILLANT SUPER is a soccer ball that has been manufactured using specially developed Japanese TEIJIN microfiber. A thoroughly tested feeling of liveliness and lightness has been achieved without compromising the thickness of the material. The excellent qualities such as control and stability, which have always been main characteristics for the BRILLANT SUPER, have naturally been maintained.

The material might be Japanese but the BRILLANT SUPER is produced, as always, by our longterm supplier in Pakistan. The soccer ball is hand stitched and manufactured using high quality materials from the inside to the outside. The Zero-Wing latex bladder by SELECT ensures that the ball is constantly balanced when traveling through the air and a Double-Lock valve keeps the ball suitably airtight.

The combination of a specially manufactured underlining of finely woven cotton and polyester, together with the ultra thin and extremely flexible microfiber, gives the soccer ball an extra softness that makes it easier to kick than before.

The extremely durable TEIJIN microfiber material ensures that the soccer ball maintains its high quality and round shape and absorbs an absolute minimum amount of water.

PLAYER'S NUMBER

It's both important and expensive for every team to have good training balls. Now SELECT makes this easier - as the first in the USA - by introducing the Player's Number-concept.

On all of SELECT's most popular Club and Training balls, we have implemented a white-on-black digital 88-panel. Each player can then with a black permanent marker 'erase' the white elements of the digital 88, and thereby create his/her own Player's Number. Thereafter it's very easy to recognize his/her own ball, and get it back home after training.

NO GRASS? NO PROBLEM

Designed to outperform and outlast the competition on artificial turf surfaces

Why SELECT's Turf Specific Soccer Balls?

Increasing Number of Turf Fields.

Across the country, more and more organizations are utilizing synthetic turf surfaces that claim to deliver a "grass-like" experience. There is no denying the benefits that these types of surfaces deliver to youth and adult soccer players.

However, soccer players can testify to some of the harsh characteristics of artificial surfaces:

- Synthetic surfaces can cause a standard ball to skip and roll more quickly than it would on a grass surface.
- The rubber filling and synthetic fibers can cause a standard ball to peel and rip from regular use.

What Makes SELECT's Turf Series Different?

SELECT's commitment to innovation and quality has led to the development of the FPUG material used on SELECT Turf Series balls. FPUG is an extremely durable yet soft casing that improves the life of your soccer ball while ensuring natural playing characteristics.

ALL of SELECT's Turf Series balls are 100% hand stitched. By handstitching (vs machine stitching or using glues), SELECT has ensured that these balls will maintain their shape and offer exceptional durability.

LOW BOUNCE FOR OPTIMUM CONTROL

The popular SELECT FUTSAL SUPER is now thermo bonded. TB is a method that activates glue with heat and pressure to bond the 32 panels of the ball. There are no stitches, and the TB ball takes up less water keeping the original weight better when playing in wet conditions. Thermo bonding also gives the ball a fantastic touch.

Hidden behind the elegant exterior of the futsal ball hides a specially developed butyl bladder with polyester fibers inside. That ensures a very reliable low bounce compared to a normal football making it much easier to control. All our balls have a butyl valve inside covered by foam to avoid the bladder from puncturing when inflating the ball.

To stabilise the ball and ensure it remains round, the 32 panels are lined with several layers of textile material. The lining helps to adjust the softness and improves the contact between the ball and the foot.

The outer layer of the ball is made of synthetic leather in polyurethane (PU). The surface of the FUTSAL SUPER TB is in a new 3D diamond structure ensuring optimal friction between ball and boot.

High quality is essential for SELECT. Each ball undergoes a stringent test at our production facilities in Pakistan. The balls are tested for stitching, surface, roundness, circumference, weight, air retention and colour printing. Even the bladders are inflated to ensure perfect balance. Our standards for quality are the highest in the industry and exceed FIFA's regulations for the best match balls. The balls are of course tested and approved according to FIFA standards.

	Circumference	Weight	Bounce	Approval

GOALKEEPER GLOVES AND EQUIPMENT

AN ANATOMICAL WORK OF ART

The top model 88 PRO GRIP consists of 3 mm Quartz Latex guaranteeing a perfect grip in all weather conditions. The latex is wrapped from palm to backhand maximising the catching area, and the negative glove cut provides constant latex contact between the hand and the ball. The soft airprene inside provides optimum comfort, increases the glove's flexibility and ensures minimal water absorption when playing in wet weather.

With the aid of an Anatomical Fit System the gloves have been designed with a slight bend according to the natural gripping position of the hand. Thus ensuring comfort, flexibility and movement of the glove in time with the speed of the fingers.

A wide wrist strap allows a feeling of stability and safety in the wrist. The wrist is asymmetric and has an elastic insert to ensure easy entry into the glove.

PERSONALIZE YOUR GLOVES

On all the gloves in our range, we have made space to print a name on the wide latex strap. Contact your local distributor for details.

Types of cuts

Negative Cut

A popular glove cut choice that reminds of Flat Cut. This style of cut also has gussets between the palm and the backhand. The gussets of the 88 glove are also made of latex giving constant latex contact between the glove and the ball. Negative Cut fits snuggler and the fingers are held in place giving optimal ball contact when catching. This is the most common cut among professionals.

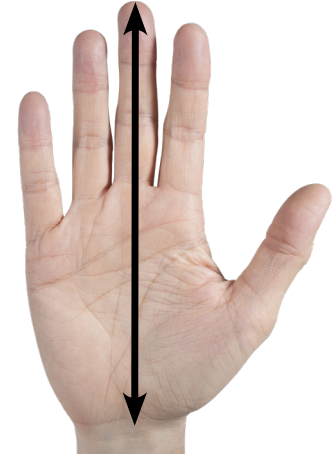

Hyla Cut

Features the best aspects of a roll cut and a flat cut. Latex is rolled around the individual fingertips for a snug fit and feel combined with a flat style palm that gives the fingers increased comfort and breathability. The unique combination of fit and feel allows the user to have the great fit of roll finger combined with the flexibility of flat cut.

Flat Cut

Traditional glove cut with a flat palm construction providing a larger area of contact and making the glove more flexible. This style of glove typically fits looser than many other styles with more room for the fingers. Flat Cut is the most popular cut used for finger protection gloves.

Glove size

Measure the length of the hand as shown and find suggested sizes in the chart below.

Latex technology

Flexion Latex

Durable latex developed for youth gloves. Suitable for all weather conditions

New Basic Latex

Durable latex with a fantastic grip in all kinds of weather that makes it suitable for both training and matches

New Softy Latex

Soft and durable latex - suitable for all weather conditions. Highly recommended to pre-wet for best grip possible

Dura Grip Latex

Soft and strong latex for all weather conditions. The latex is longlived and suitable for both training and matches

Dura Pro Latex

Strong and durable latex especially suitable for use on artificial grass

Elite Super Soft

High quality latex for professional matches. The glove has a perfect grip in all kinds of weather.

Super Soft Latex

Very soft and durable latex, used for professional match gloves. Provides a good grip and optimum contact with the ball. Well-suited for all weather conditions.

Ultra Pro Latex

Soft and hardwearing latex, especially developed for our best youth gloves, that combines durability with a fantastic grip. For all weather conditions.

Nova Grip Latex

Top performance latex. Ideal for professional gloves. Provides a good grip in both dry and wet weather compared to other kinds of latex.

Elite Soft Latex

Top performance latex with a good grip in all kinds of weather and great contact with the ball.

Glove technology

Anatomic Fit System

Ensures correct fit, as the glove is designed according to hands' natural grip position

Punch Zone

In non-sliding material for increased force and reduction of the rotary effect on the ball

Wide wrist

Extra wide wrist strap for improved support and comfort

Comfort

Mesh on the inside of fingers to ensure good air circulation

Flexibility

Injection mold spiderweb design for a lightweight feeling and increased flexibility

Protection

Fixed guards

For reinforcement and protection of the fingers

Latex on fingertips

For stability and impact protection

massage therapist
everywhere

BALL-PUNKTUR & BALL-STIK

Ball-Stik and Ball-Punktur was developed more than 45 years ago by relaxation therapist Grete Wolfgang. Since then, the massage balls have become iconic and used in gyms, schools and private homes.

The massage balls soften muscles, stimulate the blood circulation and create lymphatic circulation to reduce swelling.

They are produced in Denmark, and have been since 1972, with phthalate-free plastic.

“Unfortunately, modern life takes place strictly on flat surfaces. We are no longer challenged and lock up our feet in shoes with rigid soles. This causes our bodies to become lazy and forget our natural flexibility. Ball-Punktur is a great way to wake up our bodies again.”

Kristoffer Glavind Kjær, Body Therapist treating top athletes in cycling and handball and owner of ManuVision.

Ball-Punktur is small and handy and can be brought everywhere.

Treating the Tour de France riders, Kristoffer has introduced the Ball-Punktur to help riders like three-time World Champion Peter Sagan recover from a day's race by reducing muscle tension, effectively strengthening muscles and increasing blood flow to help them perform at the highest level.

The massage ball also follows the Danish national handball team, as it was a part of the 2019 IHF Men's World Championship when they took first place, and Ball-Punktur will also be present at the Men's EHF Euro 2020.

BALL-PUNKTUR

- 20 weeks lead time from signed order and approved design
- Up to 4 colors
- Multiple stamps

LEGENDARY SINCE 1947

SELECT Sport was founded in 1947 by Eigil Nielsen, goalkeeper for the Danish national soccer team, who devoted his life to create the perfect ball. The name of the company was given because of the exclusive leather that was specially selected for the ball production.

By producing many of the ball industry's groundbreaking creations such as the first laceless soccer ball, the first ball with 32 panels and balls made of synthetic leather, SELECT naturally became a trendsetter.

Back in 1951, SELECT signed a contract to supply balls for the Danish national soccer team. This partnership has continued ever since and is one of the longest in the history of sport. A large number of agreements with remarkable soccer federations, clubs and players have since been made.

Today, SELECT is known as the ball specialist. Our soccer balls and futsal balls can be found in more than 50 countries, and we are the world's largest supplier of handballs. More than three million different SELECT balls are produced each year through a close cooperation with Anwar Khawaja Industries in Pakistan.

We have been developing balls for 70 years, and the passion for innovative craftsmanship still lives on in our daily work. Soccer, futsal and handball matches around the world are played with balls built on Eigil Nielsen's original principle of 32 panels, just as most balls produced worldwide are based on SELECT's inventions.

player's choice™

1947 Eigil Nielsen develops his first soccer ball and SELECT is born.

1951 SELECT presents the world's first laceless soccer ball.

1962 SELECT presents the world's first 32-panel soccer ball.

1974 SELECT presents the world's first hand stitched PU soccer ball.

2012 SELECT presents the world's first intelligent soccer ball, the SELECT iBall.

2017 SELECT introduces its first Dual Bonded range of soccer balls.

2022 SELECT introduces its first Thermal Bonded range of soccer balls.
